## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
2. Claims 9-11 and 38-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bowsky et al (US 5,129,843).

Bowsky et al discloses a plastic shield (8) for preventing arc around an electrical stud (7), made of plastic material (figures and co. 3, lines 45-50, col. 4, lines 12-31).

Bowsky et al fail to teach the shield comprising a generally inverted U-shaped configuration adapted to at least partially surround the electrical stud, the shield constructed of a non-conductive material, the inverted U-shaped shield having a first planar side having an upper edge, a second planar side extending inwardly from the upper edge of the first planar side and having an inner edge, the second planar side oriented in a plane generally

perpendicular to the plane of the first planar side, a third planar side extending from the inner edge of the second planar side, the third planar side oriented in a plane generally parallel to the plane of the first planar side to form the inverted U-shape, and the thickness about 10-15 thousandths of an inch.

However, Bowsky et al disclose shape and number of wall shields can be vary (col. 4, lines 25). Therefore, it would have been obvious to an ordinary skill in the art at the time applicant's invention was made to modify the shape of the shield to conform to the arcing directions.

Furthermore, since applicant is claiming the shield, it is capable of being installed on a welding apparatus with plurality of ribs attached to it.

### ***Response to Arguments***

3: Applicant's arguments filed 2/06/07 have been fully considered but they are not persuasive.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the

applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Furthermore, Bowsky et al disclose shape and number of wall shields can be vary (col. 4, lines 25) in accordance with the terminal assembly pins in order to conform to arcing directions. Therefore, it would have been obvious to an ordinary skill in the art at the time applicant's invention was made to modify the shape of the shield to conform to the arcing directions.

### *Conclusion*

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
